

Corrosion Preventative for New and In-Service

Transportation Fleets, School Bus Operators, Refurbishers & OEM's

For your Applicator's Safety

- Contains no solvents
- Does not contain barium
- No V.O.C. emissions
- No WHMIS controlled ingredients
- High flash point
- Safe to apply in regular service bays

For your Vehicle's Protection

- Certified laboratory ASTM B117, passing 100 hours of testing
- Creeping capability into tight seams and crevices to displace moisture
- Excellent adhesion to all types of metal surfaces
- Does not "build up" with repeat applications
- Formulated from new materials only, with no adverse effect on rubber, electrical systems or composite materials
- Product lubricates window and lock systems, etc.
- Designed as an annual application and can be applied to new or corroded surfaces

48 Hours Salt Spray Testing Cold Rolled Steel
