

Protection for Motor Cars

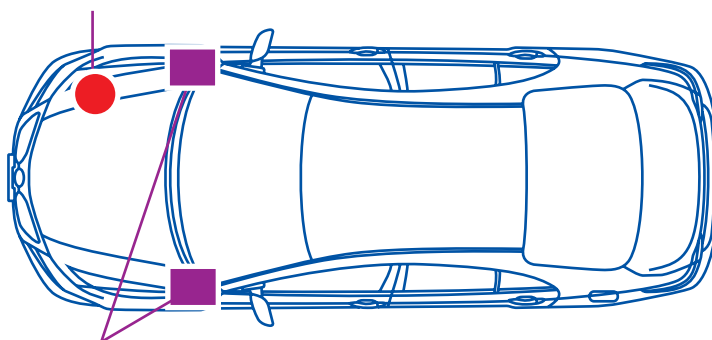

Model:	2WD Heavy Duty System
Product Code:	2WDHDSFK
Description:	CouplerTec Electronic Rustproofing System 12V - Two Capacitive Couplers

This system has been specifically designed to protect motor cars (hatchbacks, sedans, wagons and small vans*) from rust. It will also dramatically reduce the effects of corrosion on those vehicles which are frequently exposed to use within highly corrosive environments such as; driving on salted roads. In other words, it will extend the life of these vehicles. As good as this product is, it is not a miracle cure for badly rusted vehicles, as the more rust or corrosion a vehicle has, the harder it is to stop. (*For large Vans LWB use the larger 4WD Heavy Duty System).
